

The enCloud™ Management System

Account Development Module

TYou can track your EN-400™, EN-1000™, EN-2000™, EN-3000™, and EN-4000™ routers (EN™ devices) via a direct connection to your computer, or over a LAN, or in several other ways, including through Encore Network's enCloud™ management system.

The enCloud™ system lets you track your network from anywhere with a connection to the internet. You can use a computer, a tablet, or a smartphone to track your devices. Development and use of enCloud™ are discussed in the documents listed below.

Note: For a quick basic configuration, without details, see the [QuickStart Guide for the enCloud™ and enSite™ Management Systems](#).
